Interviewers assess understanding of memory layout and data alignment. Candidates should explain that `sizeof` returns the size in bytes of a data type or variable and demonstrate with code snippets.

Q3. Explain the concept of variable scope and lifetime in C.

Explanation:

This question probes knowledge of local vs. global variables, static variables, and their lifespan during program execution.

Pointers and Memory Management

Q4. What are pointers? How are they used in C?

Explanation:

Pointers are variables that store memory addresses. Candidates should explain their importance in dynamic memory management, array handling, and function parameter passing.

Q5. Differentiate between `NULL`, uninitialized pointers, and dangling pointers.

Explanation:

Understanding pointer safety is critical. Candidates should describe best practices for initializing pointers and avoiding memory leaks.
